

CSB-System
INTERNATIONAL

We would like to invite you to visit our booth during the Bakery Showcase -2010!

Delivering Unparalleled Results by Combining Exceptional People with World Class Software!

CSB-System is a leading developer of innovative software solutions for the food and beverage industry. We understand how complicated your business environment is and we know that effective management demands controls in order to stay on top of the ever changing marketplace. The CSB-System industry specific software solution sets a new standard for conducting business within the industry.

Our industry standard solutions are designed to be configured in accordance with your unique processes; providing the foundation for your organization to grow. It is our unparalleled capabilities relating to recipe management, yield management, traceability and costing that emphasize our strong customer focus. We are committed to providing functionality for the entire enterprise; including Enterprise Resource Planning (ERP), Supply Chain Management (SCM), Automated Data Capture (ADC), Computer Integrated Manufacturing (CIM), Electronic Data Interchange (EDI), and more.

CSB-System solutions combine the right people with the right tools in order to ensure increased efficiency, stronger customer relationships, and maximum profits within the food and beverage industry.
